#1 Philosophy & mode of collaboration

Philosophy

The Open Urbanism Foundation wants to keep you as involved as possible in the collective intelligence process, and to do this, we want to save you time by creating the conditions for fluid and easy interactions.

How we work together

The contributory process is organized according to the following points;

1 - Promote your contributions

2 - Implement your contributions in the call

3 - Document and make accessible the process

to facilitate the future integration of partners

4 -Be inspired by the 4 freedoms of free software

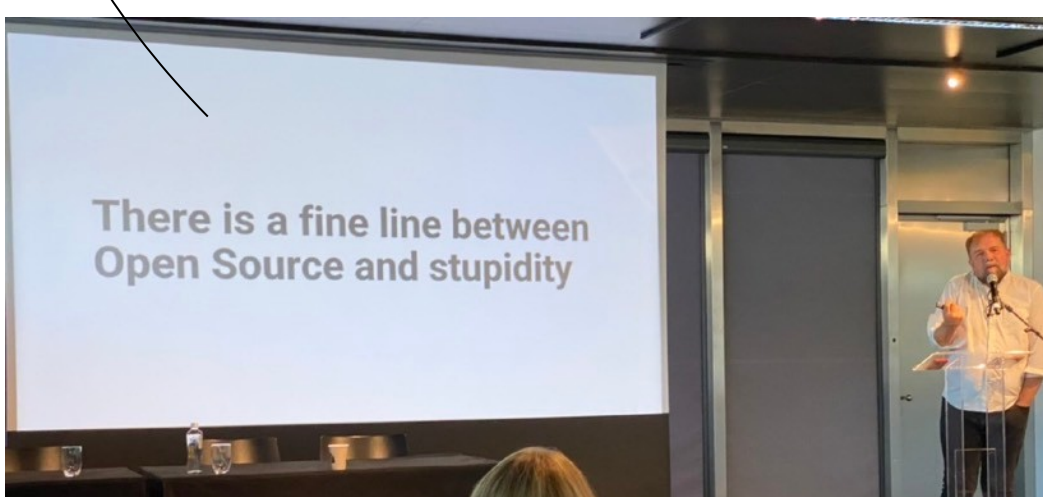

- > Run: you can take ownership of the call process
- > Study: you can study it and deconstruct it
- > Share: you will be able to copy and share this process type
- > Improve: you can transform and improve it

5 -Be inspired by the duties and logic of free

- > Acknowledgement: specify contributors
- > Share at the right time: share outside the core group of contributors only sufficiently advanced documents, think strategically

Innobooster Impact Entrepreneurship 20/1/ 2022 V2

Innovative business models infrastructures for sustainable radical innovation spreading

The necessity of the Impact Entrepreneurship Innobooster Radical innovations that can produce sustainable impact with social values in Switzerland needs dedicated support to grow and to duplicate.

Market Oriented

The Innobooster impact entrepreneurship produce the operative frame to support radical innovations in the field of resilient territorial dynamics, open health, non formal education and inclusion. By sharing new business models based on 1/ open innovation for high quality performances, 2/avant-garde (or ? tailor made for the impact entrepreneur IP intellectual property rights that facilitate mutualisation to save time and resources and 3/learning from the commons organizational mode that build market success based on cooperation.

New capabilities and worldwide access

By using the Innovation Booster Impact Entrepreneurship business models, the innovation teams will develop their capacity to enter the market with unfair advantage and increased chances of success by attracting the best collaborators and clients. More over, because the Geneva bases mother house acts at the national scale, the Innovation Booster Impact Entrepreneurship will give innovation teams of all cantons direct access to International sectors and to local governments worldwide, thanks to alliance members from the International Geneva ecosystem such as the Geneva Cities Hub (link).

Complementarity with other Innovation Boosters

Why does the Ellas Innovation Booster participate in the alliance along other already interested Innoboosters*? Because the IE Booster opens the path to productive events each year to attract innovative teams around cross and complementary thematics. By instance, the IE Booster subtheme resilient territories opens the ground for cooperations with Smart Cities and Energy Living Labs Innovation Boosters... the IE booster subtheme open health will connect to the Sport Innovation Booster. Same with subthemes education and inclusion...

Established definitions of Impact Entrepreneurship

Academic fields (HEC Liège) : Impact Entrepreneurship refers to the process favoring the creation and growth of enterprises that are ethical, transparent, and have a meaningful impact on our lives and society. Unlike non-profit, they focus on creating social impact through market strategies.

Entrepreneurial field (Ernest & Young): Impact entrepreneurs are purposefully driving progress toward the UN Sustainable Development Goals (SDGs). From digital tools to long-term capacity building services, (they build) life-changing businesses and achieve greater scale and impact.

#4 Taking into account the exercise of the call

Answering the call has nothing to do with a research report.

It is important to bring together the complexity and abundance of ideas into an easily readable, clear and non-confusing document.

Consider helping reviewers understand the potential of the project without losing them in complexities that do not add to the evaluation

Corresponds to the typical start-up pitch, with the addition of ;

1 compliance with the Innosuisse framework

2 the ability to build a vibrant and open ecosystem alliance

3 the ability to mobilize communities of innovators

Give examples of success stories

High end for the Swiss cf jewelry

Open Data for open innovation efficiency

Social cohesion through entrepreneurship as new capacities to act

Demonstrate the ability to support risk-taking by innovation teams

(necessary for radical innovations)

Helping with the problem statement, exploring the issues

Demonstrate local roots through the alliance's branches

#4 Completed brainstorm panels

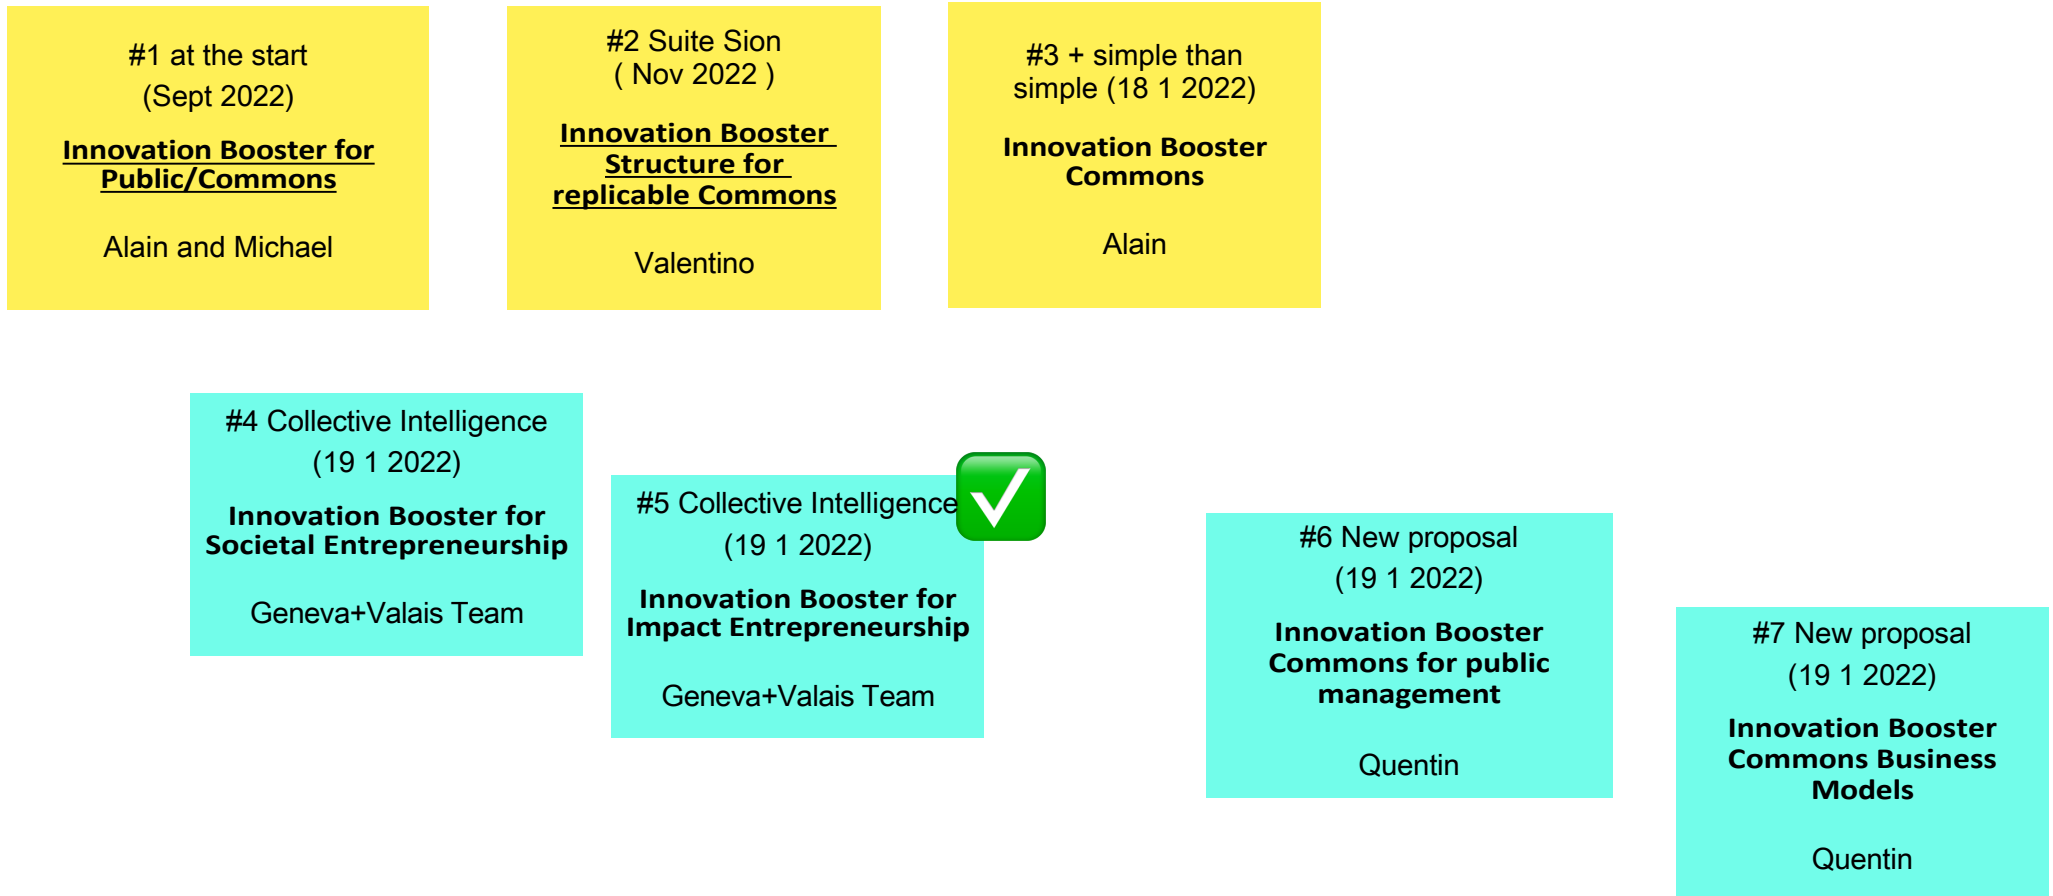

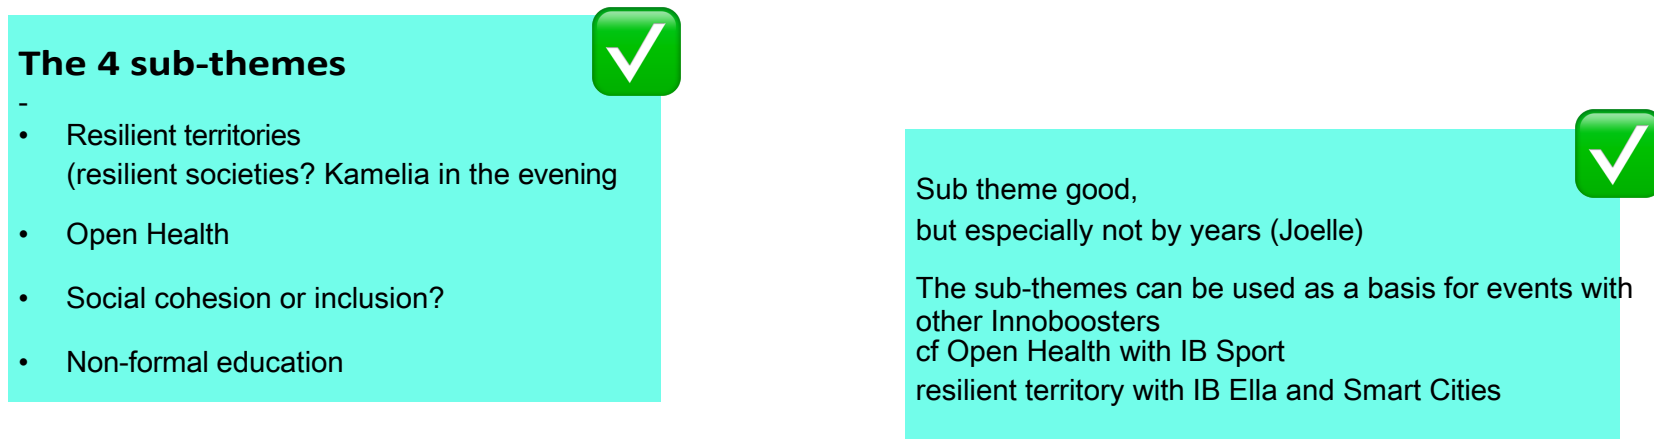

Beware of the scoring system

No sub-theme among the 8 criteria can be lower than the average!

1.1 Theme/principal ?

1.2 Focus by year of application ?

1.3 Possible names ?

Defined during the discussion of the main theme 1.1

Innovation Booster for Impact Entrepreneurship

Technical and strategic organization mode to enable actors to think and develop radical innovations

New frontier...

- **The why:** to make radical innovations that produce sustainable companies, ethical and in phase with the ODS, thus capable of producing economic and social value
- **The how:** how to organize the commons
- **The what exactly:** business models and innovative cooperation frameworks licenses, legal, culture

Subject to be treated as soon as possible

As soon as the theme and name are specified

Ella, Joëlle and Valentino, could propose partners through the Fab Lab network

2.1 Which partners for the Alliance?

#1 Imperative 3 languages #2 The maximum of Canton #3 Choosing to write in English

2.2 Complementarity with other IBs? see 1.2

Do not forget differentiation

2.3 Plausibility ?

- 2.3.1 mobilize a sufficiently large community of innovators

Around entrepreneurship and management

Go get the students of Hackatons

- 2.3.2 to bring out innovations capable of producing economic and social value

2.3.1 Projects with the State of Geneva give rise to many common carriers
Ideavox project as much with the Hospice General as with the Antenna Foundation (Salt batteries)
OpenUrbanism Foundation project with local governments that use the commons and open up the development of services based on the commons

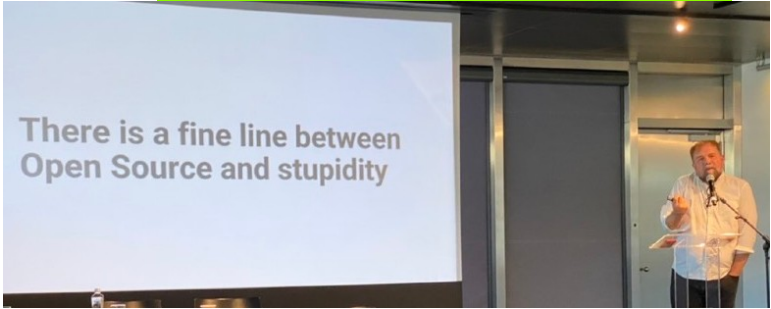

2.3.2 These communities of actors in their differences open on innovations capable of producing economic and social value
However, the work will have to be done at the Swiss level, need partnerships

See link and Arduino example
How Arduino succeeded
Business model association based on Open Hardware, management, ethics and an understanding of the risks and benefits of Open Source ...

2.4 Risks of failure of the process?

- in opposition to traditional competitive ways of doing things
- opposition to the militant culture?

The booster must show its complementarity and has all the assets to link of text "Commons as a Business Model?"

1 Well defined,
2 avoid the catch-all
3 Finding the right actors

The booster acts as a bridge across the need for meaning and efficiency ... students and professors in management, business school, student knowing the limits of washing ... and committed people who need to take their projects to stages of pro development...

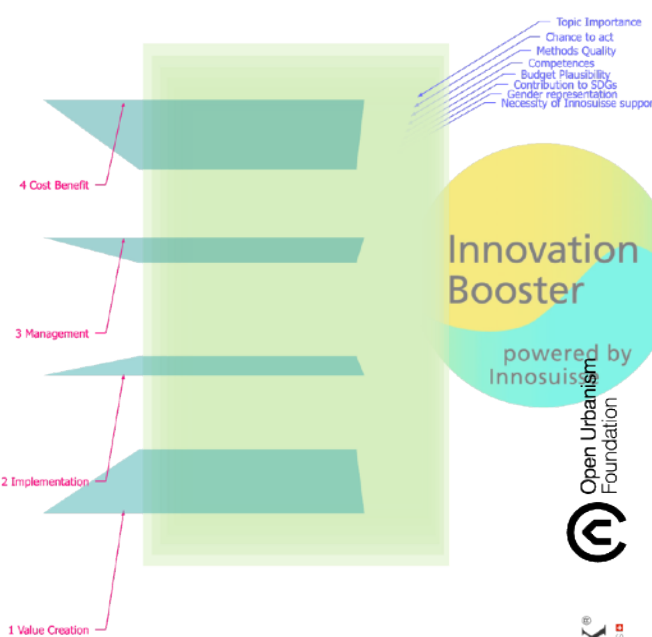

2.5 Solutions?

- Crops Ability to communicate

- Scientific approach Avoiding the consequences of non-factual

- Facts Give demonstrative examples anchored in reality and not utopias

- Impact by duplication fluidity Importance of Quentin right of innovation...!!! Innovative IP

Importance of the **Impact Entrepreneurship** theme

Established definitions of Impact Entrepreneurship

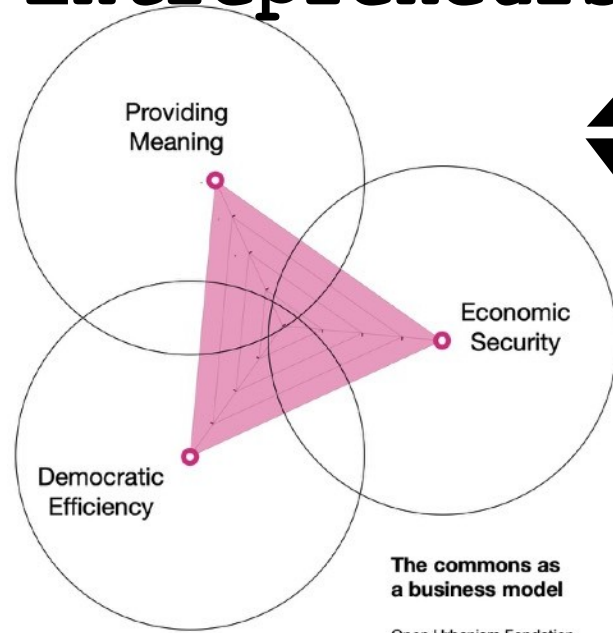

Academic fields (HEC Liège):

Impact Entrepreneurship refers to the process favoring the creation and growth of enterprises that are ethical, transparent, and have a meaningful impact on our lives and society. Unlike non-profit, they focus on creating social impact through market strategies.

Entrepreneurial field (EY):

Impact entrepreneurs are purposefully driving progress toward the UN Sustainable Development Goals (SDGs). From digital tools to long-term capacity building services, (they build) life-changing businesses and achieve greater scale and impact.

Huge Linux and open source buyout: IBM opts for Red Hat

For nearly \$34 billion, IBM is buying Red Hat.

Watalux Demonstrator of economic value through the commons!

Lionel

Trying to make money and not to be an asshole... Remove friction to help people to achieve their goals."

Massimo Banzi
LUGANO Innovation Camps

Red Hat will join IBM's hybrid cloud team as a separate division. Red Hat's technology will run on multiple clouds. According to IBM, 80 percent of enterprise workloads

has not yet migrated to the cloud **due to the proprietary nature of this market at this time.**

"This prevents data and application portability across multiple clouds, data security in a multi-cloud environment and consistent cloud management. "

CURRENT & FUTURE IMPORTANCE OF THE INNOVATION TOPIC

Temporalities, **Agility**

DEFINITION + CHANCE THAT THE INNOVATION TOPIC WILL LEAD TO INNOVATION PROJECTS DURING THE SUPPORT PERIOD

Numerous active examples show that the mode of organization of the commons produces innovations, including within projects led by the alliance

That many researchers are studying the performance of this mode of organization and its efficiency for the SDGs

The problem addressed by the IB is rather to maximize the success and duplicability of innovations that today need a framework to be deployed on a larger scale and/or duplicated

Whatever the complexity of the topics, it will be necessary to take into account the need of the examiners to have clear information and the global vision...

The 4 sub-themes

- Resilient territories (resilient societies? Kamelia in the evening)
- Open Health
- Social cohesion or inclusion?

Example of efficiency in the organization of the commons in the field of social cohesion with Ecojeune and the presentation of Sabina/ exchange with beneficiaries

<https://www.hospicegeneral.ch/>

• **Connectthink**

Initiated by Adam and Ryan during the Covid pandemic in the face of information overload and then developed in the context of Eco-jeunes with Gianni, Connectthink is a platform that brings together information on various themes. It allows contributors to use their discernment and critical thinking about the nature of the information they are confronted with.

• **Data Mentis**

Led by Mélyssa, Data Mentis aims to raise public awareness about the use of screens and the sometimes addictive effects of social networks. Eventually, Mélyssa will also offer prevention workshops on overexposure to screens.

• **Open Games Hub**

Before joining the Eco-Youth program, Anthony didn't know what career path to take. Thanks to the program, he was given the time and tools to think about it and realized that he was passionate about video games. With this in mind, he is currently developing a platform dedicated to online gaming enthusiasts.

• **Open Music**

Berfin has always been interested in events, an interest that was reinforced by her experience within the measure. She has since developed Open Music, which aims to support local cultural actors and to link them with the stages and various production venues in Romandie. After having masterfully managed the bar during the Festijovial, Berfin has decided to pass her license.

• **Seetyscape**

Kilian is a newcomer to the Eco-Youth measure but his project is already well underway. A keen urban planner, he has created Seetyscape, a platform on mobility and transport in Geneva. Open to citizens, it will offer three services: reporting (for example, when a road marking is erased); ideation: everyone will be able to submit an idea to improve the city's urban infrastructure; examples to be reproduced: a nice idea seen in another Swiss city or in another country that could be transposed to Geneva

• **Angelium**

As he admits, Luca used to be all about "money, money, money". But since he joined the Eco-jeunes adventure, his mindset has evolved. With Angelium, his ambition is to create privileged links between entrepreneurs and candidates.

Compatibility with the SDGs

CONTRIBUTIONS TO THE SUSTAINABLE DEVELOPMENT OF SOCIETY, ECONOMY AND ENVIRONMENT

The SDGs are divided into six themes:

- Dignity - ending poverty and fighting inequality
- The people - ensuring healthy lives, knowledge and integration of women and children
- The planet - protecting our ecosystem for all societies and for our children
- Partnership - catalyzing global solidarity for sustainable development
- Justice - promoting safe and peaceful societies and strong institutions
- Prosperity - cultivating a strong, inclusive, and transformative economy

Evidence to be developed

In base The support for the impact entrepreneurship of our IB is based on the organizational mode of the commons which carry in their DNA the preservation and the development of the resources, the mutualizations, the cooperations before the competition which involves losers, and often the environment

Taking gender into

MEASURES TO IMPROVE AND SUSTAIN APPROPRIATE GENDER REPRESENTATION AND PARTICIPATION TO MANAGEMENT AND ACTIVITIES

To be vigilant steering committee and the whole project.

The gender dimension in knowledge and technology transfer- the German case

K Best, A Sinell, ML Heidingsfelder ... - European Journal of ..., 2016 - emerald.com

https://www.emerald.com/insight/content/doi/10.1108/EJIM-07-2015-0052/full/html?utm_campaign=Emerald_Strategy_PPV_November22_RoN

Purpose

Knowledge and technology transfer (KTT) and particularly academic entrepreneurship (Klofsten and Jones-Evans, 2000) are indispensable for economic growth and wealth creation. In many European countries including Germany, substantially fewer women than men participate in KTT. Recently, decision makers from scientific, political, and commercial organizations have increased their attention to the gender dimension (e.g. Moser, 2007; Schiebinger, 2013). The purpose of this paper is to evaluate in what ways and to what degree gender is currently integrated in German KTT.

Design/methodology/approach

By following an abductive approach (Suddaby, 2006) and building upon existing models (Klofsten and Jones-Evans, 2000; Carlsson et al., 2002; Lundvall, 2010), the authors developed an analytical framework for evaluating the position of the gender dimension in KTT, conducted a comprehensive literature review, and 22 key informant interviews.

Findings

The findings indicate that the gender dimension is barely integrated in German KTT, which particularly manifests itself through the fact that there are fewer than 10 per cent women among academic entrepreneurs. Current organizational practices and attitudes of decision makers continue to reinforce traditional gender roles and "typically male" approaches and behaviours (Connell, 2005; Redien-Collot, 2009).

Originality/value

The authors were the first to synthesise a variety of sources into one unified framework and to rigorously analyse the gender dimension in German KTT - both quantitatively and qualitatively and on different levels. This framework can help decision makers, both in- and outside of Germany, re-envision KTT practices, and create new opportunities for its diverse participants.

NECESSITY OF INNOUISSE SUPPORT

Need for the IB device

NECESSITY OF INNOUISSE SUPPORT IN THE CHOSEN TOPIC TO MAKE SURE KTT HAPPENS

Disseminate culture, create bridges between institutions and put in capacity to act companies, citizens, researchers ...

Won't a certain freedom disappear through the IB system?

Need to preserve the freedom of emergence of radical innovations and rationally organize the best possible support

2 directions

> Unleashing the institution

Social innovations

Desired by Innosuisse, but difficult to evaluate

Need for the time provided by the IB device

to change the understanding and the look of those who use the commons

Funding requirement provided by IB

This time is given by the financing of the 4 years of the IB where events, meetings, communications will be multiplied on different channels, online and face to face, on the scale of the Swiss territory

Overall construction of a new culture from the time and funding of the IB device

allows for the appropriation of the framework for impact entrepreneurship,

Usually this phase is not funded

and innovators are alone to sell their services + create a culture

the device maximizes radical innovations

1 Communities help each other from the framework and support the alliance

2 the Alliance builds and communicates the culture that believes in each radical innovation project demonstrator

(15 projects per year)
